Hey there,
I am feeling really dense right now; I should know this right off hand but I really am spaced out this morning. Scott/Teresa- was/is para chlorobenzene sulfonic acid (p-CBSA) one of the surrogate chems?

Hi Jason,

p-CBSA is the chemical that you reviewed the CalEPA document. I believe that SRC is developing a surrogate PPRTV for this chemical, sorry I should have differentiated between a no value and a surrogate PPRTV. Wasn't p-CBSA added to SRC's surrogate development list or am I mistaken?

Thanks,
Phillip

Good morning Phillip,
I feel like I should have a handle on p-CBSA but I am totally blanking right now. Were we (i.e., Alt Methods team) developing a surrogate PPRTV for this chem? There is a no-value document for p-CBSA currently on the database (circa 2009). But were we doing something else for this chem?

Hi Teresa,

Can you please check with SRC to see when the no-value PPRTV for p-CBSA will be finished? That should give us an idea of when the PPRTV will be posted and the STSC can feed that back to Dan Stralka.

Thanks,
Phillip

Hello,
Just checking in to see if p-CBSA is undergoing a review and is it still on course for release in early 2016?

Dan

Dear Daniel and Michael,

Please see the attached response from STSC Hotline Director Phillip Kaiser in regards to your request for assistance evaluating a CalEPA document and health goal for p-chlorobenzene sulfonic acid. We hope the response fully addresses your request. Please let us know if you have any further questions.

Thank you for contacting the STSC.

Sincerely,

Jacki Toms
